

# EXLAN WEAR SKIDS

## Instruction for replacement

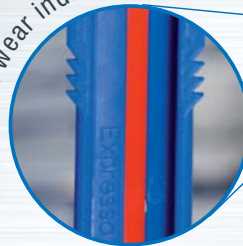

When the wear indicators appear, it is time to replace your EXLAN wear skids

**Basic equipment needed:** Screw driver, Hammer or mallet, Wooden block, Damp cloth

Red wear indicator

### FOR QUICK REPLACEMENT OF THE EXLAN WEAR SKIDS

- Using a screw driver, pry off the 4 special fixing clamps. (a)
- Remove the 2 worn rear skids and clean the aluminium surface of any soil or debris.
- Fit the new EXLAN skids. Ensure they are positioned centrally.
- Lock the new skids into position, by tapping the special fixing clamps approx 20 mm in the direction as shown. (b)

**! Note the clamps will only fit one way !**

**Our Tip!**

Always remember to keep a spare set of skids and clamps on hand **READY FOR USE!**
